## Full Stack Web Developer

### PROFILE

I am a self-motivated and passionate IT personnel with a keen interest in full stack web development. I am proficient in writing HTML, CSS, tailwind, SASS, Gits & Github, Figma, and Bootstrap. Experienced in database management with SQL and MongoDB databases. Able to design and implement responsive user interfaces, ensuring seamless user experiences. Strong problem-solving and collaboration abilities, dedicated to delivering high-quality code and meeting project deadlines. Continuously learning and adapting to the latest industry trends to deliver cutting-edge solutions

### PROFESSIONAL WORK EXPERIENCE

#### Front-end web developer

8thGear Hub & Venture Studio | 2022 - 2023

- Collaborated with the UI/UX designers to create wireframes and visual design mockups. for a website/web app
- Conducts research to understand the target audience, competitors, and goals of the website.
- Built a front-end responsive website using HTML, CSS, and JavaScript, react, next, based on the approved designs.
- collaborated with the content creators and my colleagues/fellow developers to ensure that the website is responsive and the content aligns with the website's objectives and it's user-friendly.
- Double-checked all elements to ensure everything is in place, and Prepare the website for launch on a live server or hosting platform.

#### Full-stack web developer

Diamond-Heart-Technologies| 2023 - present

- had a conversation with a client to know the journey, mission, and vision of the website and the services it will render, in order to get an idea of how the user journey and pages will look like
- Collaborated with a group of UI/UX designers to create wireframes and visual design mockups. for a website/web app
- Conducted research to understand the target audience, competitors, and goals of the website.
- shared roles among developers to build a front-end responsive website using HTML, CSS, JavaScript, react.js, next.js, And the back-end using express, node, redux, and so on based on the approved designs and functionality.
- worked on the Back-end, setting up the server, database, and business logic as needed.
- collaborated with the content creators and my colleagues/fellow developers to ensure that the website is responsive and the content aligns with the website's objectives and is user-friendly.
- Double-checked all elements to ensure everything is in place, and Prepare the website for launch on a live server or hosting platform.
